

Thank you for the opportunity and privilege to introduce the services we offer at Construction Safety Professionals, Inc.

We have been supporting oil and gas fabrication and production for over 19 years, growing from a single person start-up to a major professional HSE provider with a support team of over 75. Our services have been contracted by both major and independent E&P companies to support their fabrication, development, operating and program improvement projects in Louisiana, Texas, Colorado, Wyoming, North Dakota, California, Angola, Korea, Equatorial Guinea, Ghana, Finland, China, Trinidad, Peru, Malaysia, and the Russian States. Please see our client and project list on the attached page.

With today's economic models, and increased emphasis on HSE excellence, operating companies do not always have the in-house manpower to provide on site HSE oversight of their many worldwide projects. The CSPi HSE/Quality role for our client is transparent, supporting the client company policies and the contractor's programs by reinforcing project goals, facilitating alignment of policies, and providing regulatory oversight. CSPi prides itself as one of the leaders in the fabrication, installation and commissioning of Deep Water Development (DWD) major projects, as well as providing flexible solutions for day-to-day issues that focus on reasonably reducing risk, and maintaining HSE excellence, and working to meet and exceed project goals.

While our specialty has been DWD Platform fabrication on-site HSE oversight, the CSPi team is qualified to support Front End Engineering Design, on site fabrication, transportation, installation, commissioning and operation of your projects in fab yards, over water, and onshore. Additionally we have in-depth knowledge in HSE compliance, program/contractor auditing, safe work procedure reviews and development, and implementing best management practices that will result in continuous improvement.

CSPi has further migrated into the onshore shale plays, supporting all aspects of the drilling, construction and production activities in South Texas, Permian, North Texas/South Oklahoma, and Haynesville areas. We have over 45 team members providing HSE oversight of civil, construction, pipeline, greenfield and brownfield activities in those areas.

We would appreciate the opportunity to visit with you about how CSPi can support, and be an important part of your project team.

"We are part of the Solution"

Sincerely,

Clyde J."C.J." Monlezun
President

CLIENT AND PROJECT LIST

Anadarko	Lucius and Heidelberg Projects (Fabrication thru Commissioning)
BHP Billiton	Neptune, Shenzi, Angostura (FEED thru Commissioning)
BHP Billiton (shale plays)	Eagle Ford, Haynesville and Permian Basin shale development to include: well pads, drilling, pipelines, compressor stations, pumping stations, tank Batteries, roads, brownfield sites, and loading facilities.
BP	Holstein, Mad Dog, Atlantis, Thunder Horse, Mardi Gras Pipeline, Mad Dog 2 Projects, and Marine Operations including Balder Heavy Lift and Numerous Seismic, and Support Vessels. BP Trinidad and Tobago Amherstia, Cassia B and Angostura, BP Angola Blocks 18 & 31. BP Alternative Energy Wind Turbine Farms, Houston Campus Office Building Expansion and MC 252 Spill Response(FEED thru Commissioning)
Chevron/Texaco	Tahiti, Jack/St Milo Projects (CSPi team working thru another supplier)
Continental Resources	North Texas Drilling Program
ENI Petroleum	Appaloosa and Longhorn Projects
Hess Corporation	Pony, ROZ, Tubular Bells, Ross Compression Station, Tioga Gas Plant Expansion, North Dakota Rail Terminal, and Akom North Projects
Kosmos	Tullow Jubilee Project
Noble	Alen, Diega, Leviathan Projects (FEED thru Commissioning)
Shell	Perdido, Ursa Princess, and Olympia Projects (Fabrication and Commissioning)
StatOil-Hydro	Offshore Drilling HSE Program
Stone Energy	Gulf of Mexico Production, and Wyoming Drilling Activity
Total	Matterhorn Offshore Drilling HSE Program

Williams

Pipeline Install for Tahiti and Tubular Bells(Fabrication-Commissioning)
